Figure 1: Schematic representation of the experimental design. The figure is divided into two main sections: 'Pretest' and 'Main Experiment'. The 'Pretest' section shows a sequence of stimuli: a fixation cross, a word, a word, a word, and a word, followed by a 'Response' box. The 'Main Experiment' section shows a sequence of stimuli: a fixation cross, a word, a word, a word, and a word, followed by a 'Response' box. The 'Main Experiment' section also includes a 'Word' box and a 'Response' box. The 'Main Experiment' section is further divided into 'Block' and 'Random' conditions. The 'Block' condition shows a sequence of stimuli: a fixation cross, a word, a word, a word, and a word, followed by a 'Response' box. The 'Random' condition shows a sequence of stimuli: a fixation cross, a word, a word, a word, and a word, followed by a 'Response' box. The 'Main Experiment' section also includes a 'Word' box and a 'Response' box.

WEEKLY SUBSCRIPTIONS: \$12.00 PER ANNUM IN ADVANCE. Single copies: 50¢. Payment in advance is required. Payment may be made by check, money order, or cash. All payments should be sent to the publisher. Subscriptions outside the United States add \$5.00 per annum. Subscriptions outside the United States add \$5.00 per annum. Subscriptions outside the United States add \$5.00 per annum.

Figure 1 illustrates the experimental setup. A subject is seated at a table, viewing a video screen. A video camera is positioned above the screen. A light source is positioned to the left of the screen. The subject is viewing the video screen, which displays the visual feedback. The video camera captures the subject's hand position and the light source's position. The light source is positioned to the left of the screen. The subject is seated at a table, viewing a video screen. A video camera is positioned above the screen. A light source is positioned to the left of the screen. The subject is viewing the video screen, which displays the visual feedback. The video camera captures the subject's hand position and the light source's position. The light source is positioned to the left of the screen. The subject is seated at a table, viewing a video screen. A video camera is positioned above the screen. A light source is positioned to the left of the screen. The subject is viewing the video screen, which displays the visual feedback. The video camera captures the subject's hand position and the light source's position. The light source is positioned to the left of the screen.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

[illegible][illegible]

Figure 2. The effect of the initial concentration of the monomer on the polymerization of  $\alpha$ -methylstyrene initiated by  $\text{BuLi}$  in THF at  $-78^\circ\text{C}$ . The polymerization was carried out in the presence of  $[\text{BuLi}] = 0.001 \text{ M}$  and  $[\text{M}] = 0.001 \text{ M}$  in THF at  $-78^\circ\text{C}$  for 10 min. The polymerization was terminated by the addition of methanol. The polymerization was carried out in the presence of  $[\text{BuLi}] = 0.001 \text{ M}$  and  $[\text{M}] = 0.001 \text{ M}$  in THF at  $-78^\circ\text{C}$  for 10 min. The polymerization was terminated by the addition of methanol. The polymerization was carried out in the presence of  $[\text{BuLi}] = 0.001 \text{ M}$  and  $[\text{M}] = 0.001 \text{ M}$  in THF at  $-78^\circ\text{C}$  for 10 min. The polymerization was terminated by the addition of methanol.
