**Pos. 4000 1 pcs. L-Series Cushioned Stop Unit**

Item # 68339(1)-0-87903

ohne Grundplatte

The double geared stop shaft is brought with spring pressure to stop-position. Lowering and release of pallet take place pneumatically. The damping path is 35 mm, whereby the end position is reached.

After the pallet is released, damping carriage travels independently to its starting position.

The stop-unit control requires a 5/2-way valve, which can be offered on request.

The holder for a pallet presence sensor is mounted on stop-unit. The sensor can be offered on request.

Detecting the position of the stop shaft is not required, yet can be offered on request.
